

Dear Doctor/Practice Nurse,

Your patient completed the online **Falls Decision Support Tool** on the **Keeping Me Well** website.

Based on the responses provided, the tool advised them to contact you for further assessment.

The responses indicated that they have experienced a series of falls, along with ongoing episodes of dizziness.

Following a discussion with a clinician, they may be able to access falls prevention services for further support.

We would be grateful for your assessment and guidance regarding appropriate next steps, including any onward referral that may be considered appropriate.

Yours faithfully,
Keeping Me Well
